

Remind App ~ High School Math

I use *Remind*, a free app, to send information and reminders to parents and high school students. I will use the app to send reminders about homework, tests and quizzes, items needed for class, and special activities going on in our classroom. I intend to send reminders several times per week. My goal is to create conversation about math between you and your student.

While this is designed for parents/guardians as well as high school students, please feel free to research this app before making a decision about your participation.

If you choose to receive updates with Remind, please use the class code below to join your class thru the app or using remind.com/join. You can also join by texting the class code to 81010.

My Class Code: _____

Please feel free to contact me with questions.

Mrs. Kelli Stanley
Flanagan-Cornell Unit #74
Practical Algebra & Algebra I
kstanley@fc74.org
